ABIMANYU GATYA DHANESWARA

Senior Software Engineer

manyuabim9@gmail.com | +62 882-9008-5962 | github.com/geekbim | linkedin.com/in/abimanyu-gatya-dhaneswara

PROFESSIONAL SUMMARY

Senior Software Engineer with 7+ years of experience designing, building, and operating scalable production systems across backend services, web applications, and cloud infrastructure. Strong expertise in Go, TypeScript, microservices, event-driven architecture, REST/gRPC APIs, and AWS. Proven track record of improving engineering efficiency through CI/CD automation, workflow automation, performance optimization, and automated testing. Experienced in owning systems end-to-end, from architecture and API design to production reliability, observability, and mentoring engineers.

RELATED SKILLS

Languages: Go, TypeScript, JavaScript, PHP, Python

Backend: Node.js, NestJS, Laravel, CodeIgniter, REST, gRPC, Microservices

Frontend: React, Next.js, AngularJS, Tailwind CSS, Bootstrap, jQuery

Mobile: React Native, Flutter, Kotlin

ERP: Odoo

Data: PostgreSQL, MySQL, MongoDB, Elasticsearch, TimescaleDB, Redis, Firebase

Messaging & Integration: Kafka, RabbitMQ, Debezium, WebSocket

Cloud & Infrastructure: AWS, Docker, Kubernetes, Terraform, Caddy, Kamal

Quality & Operations: GitHub Actions, Jenkins, Grafana k6, SonarQube, Sentry, Datadog, New Relic, Netdata, UptimeRobot

AI & Automation: LLM API Integration, OCR-based Document Processing

PROFESSIONAL EXPERIENCE

Senior Software Engineer, Grouu *(Hybrid)* **Feb 2024 - Present**

- Reduced manual operational work by 90% through real-time automation handling 10-100 requests per minute across 210 outlets and 12 warehouse locations, supporting business operations valued at approximately IDR 3-4B per month.
- Cut deployment time by 95% by designing GitHub Actions CI/CD pipelines for production application releases.
- Owned end-to-end engineering for four interconnected system areas - Admin Portal, Outlet Portal, backend APIs, and Odoo ERP - spanning architecture, frontend, backend, testing, DevOps, and production support.
- Built and operated Odoo DEV/PROD infrastructure, including database replica, automated database and filestore backups, monitoring, and CI/CD; integrated Odoo with the Admin Portal.
- Integrated 6+ external platforms covering e-commerce, payments, logistics, warehouse management, and user verification; automated receipt and invoice extraction using OCR and LLM APIs.
- Maintained 90% unit-test coverage in core codebases, implemented Grafana k6 load/functional tests, and mentored 2 engineers while gathering requirements directly from stakeholders.

Back End Engineer, Gokomodo *(Remote)* **Jul 2022 - Feb 2024**

- Built and maintained Gokokoin, the points-based loyalty program for a B2B/B2C agri-input marketplace, serving 68,000+ active members with 14.1B + points issued (1 point = IDR 1) and a 42% redemption rate.
- Architected and maintained 10+ microservices supporting eProcurement, order management, procurement workflows, authentication, integration, and real-time business systems using Go, gRPC, PostgreSQL, Kafka, Debezium, Redis, and Docker.
- Delivered real-time historical data features by integrating ERP systems using Change Data Capture (CDC) methodology with Kafka and Debezium.
- Built analytics and reporting dashboards with Metabase to provide cross-functional teams with operational and business insight.

- Maintained 70%+ unit test coverage across new and existing services, improving reliability and reducing regression risk.
- Mentored engineers through code reviews and technical discussions, improving engineering consistency, maintainability, and software development practices across the team.

Back End Developer, SALT Indonesia *(Remote, Concurrent)* **Sep 2021 - Jul 2022**

- Built and maintained 5+ microservices and a CMS for tSurvey and CROX using Go, TypeScript, NestJS, gRPC, PostgreSQL, MongoDB, RabbitMQ, Jenkins, Firebase, Docker, KrakenD, Swagger, KeystoneJS, Kinetica, Redis, and New Relic.
- Designed domain structures, database schemas, and 30+ RESTful/gRPC API endpoints to support long-term system growth.
- Achieved 80% unit test coverage while collaborating cross-functionally on Agile feature development.

Full Stack Developer, PT QODRBee Berinovasi *(Remote, Concurrent)* **Oct 2019 - Sep 2021**

- Developed and maintained company products (Woowa), corporate website, internal information system, and REST API using Laravel, Go, PostgreSQL, MySQL, React.js, Firebase, jQuery, and Bootstrap.
- Led a year-long migration of the core product codebase from PHP to Go, reducing API response time from approximately 1 second to sub-second performance while improving maintainability and scalability.
- Set up and maintained production servers and integrated multiple third-party services into company products.
- Authored API documentation for internal products and client-facing projects to support developer onboarding.

CONSULTING PROJECTS (Concurrent, Part-time)

Co-Founder & IT Consultant (Part-Time / Consulting), Dnbyte (PT Dhaneswara Inovasi Jaya) *(Remote)* **2019 - Present**

- Co-founded Dnbyte, delivering custom software across education, agriculture, retail, and commerce while leading technical delivery and stakeholder collaboration.
- Led development of Simpro PKMK UGM (research, finance, and tax workflows) and OPIM (QR-based product authentication, React/TypeScript interfaces, WebSockets, and analytics).
- Developed SIATA UPN thesis management and PPRQ online admissions; built Semut Gajah B2B marketplace APIs, order-processing logic, and real-time integrations.
- Enhanced Investor Saham Cerdas and Giat Edu investment education platforms; delivered custom CMS solutions for NPK Mutiara, Meroke Tetap Jaya, and Farrel.
- Built Petani Cerdas for Android/iOS (Kotlin, Flutter), reaching 50,000+ downloads and 37,000+ active users; developed wedding-site, QR invitation, and RSVP features for Yes She Said I Do.
- Architected Dcatat Kasir mobile POS (React Native, Supabase), onboarding pilot merchants; automated car-showroom bidding, cutting manual process time by 85%.

LEADERSHIP & VOLUNTEER EXPERIENCE

Technical Lead, Yayasan Binaa Arrofaahiyati Ummah *(Part Time, Concurrent)* **Jan 2023 - Jun 2024**

- Led development of the Tahsin App (NestJS, Next.js, PostgreSQL, Redis)
- Provided code review and technical guidance for a team of engineers.

EDUCATION

- Bachelor's Degree in Information Systems, Universitas Terbuka— Sept 2023 - Expected Jul 2027
- Web Development, QODR.ID — Aug 2019 - Sep 2021
- Teknik Komputer dan Jaringan, SMK Negeri 2 Cikarang Barat — Jul 2016 - Jul 2019

ADDITIONAL INFORMATION

Certifications: V2DP (Vulnerability Assessment and Penetration Testing), BSSN — Mar 2019 - Sep 2019

Awards: 4th Place, SMK Tangkas Teknologi by Dicoding — 2017

Languages: Indonesian (Native), English (Professional Working Proficiency)
